

Dear Staff and Students,

Re: The 18th Confirmed Case of Human Swine Influenza (Influenza A H1N1) Infection

Another confirmed case of Human Swine Influenza Infection was reported on 8 September 2009. The cases involved a hall student who was confirmed on 8th September 2009 to have been infected with the HSI (H1N1) virus. The student was now staying in hospital pending recovery. The hall unit and the associated public areas had been thoroughly cleansed with disinfectant. Staff and students are once again reminded to be vigilant in taking personal hygiene measures to avoid being infected as well as to curb the transmission of human swine influenza:

Thank you for your attention and cooperation.
