

Dear Staff and Students,

**Re: The 27th Confirmed Case of Human Swine Influenza (Influenza A H1N1) Infection**

The 27th confirmed case of Human Swine Influenza Infection was reported on 24 September 2009. The cases involved a part-time Town Centre student who was confirmed on 17 September 2009 to have been infected with the HSI (H1N1) virus and has now already recovered. The student has not returned to the Town Centre to attend courses since the summer vacation. Staff and students are once again reminded to be vigilant in taking personal hygiene measures to avoid being infected as well as to curb the transmission of human swine influenza.

Thank you for your attention and cooperation.
