

Dear Staff and Students,

Re: The 28th Confirmed Case of Human Swine Influenza (Influenza A H1N1) Infection

The 28th confirmed case of Human Swine Influenza Infection was reported on 25 September 2009. The case involved a part-time student who was confirmed on 22 September 2009 to have been infected with the HSI (H1N1) virus. The student has not returned to the campus since confirmation of infection and is now staying home pending recovery. Staff and students are once again reminded to be vigilant in taking personal hygiene measures to avoid being infected as well as to curb the transmission of human swine influenza.

Thank you for your attention and cooperation.
